## **CANADIAN NATURAL RESOURCES LIMITED ANNOUNCES NORMAL COURSE ISSUER BID CALGARY, ALBERTA – MARCH 10, 2025 – FOR IMMEDIATE RELEASE**

Canadian Natural Resources Limited ("Canadian Natural") announced today that the Toronto Stock Exchange ("TSX") has accepted notice filed by Canadian Natural of its intention to make a Normal Course Issuer Bid ("NCIB") through the facilities of the TSX or other alternative Canadian trading systems. Purchases may also be made through the facilities of the New York Stock Exchange.

The notice provides that Canadian Natural may, during the 12 month period commencing March 13, 2025 and ending March 12, 2026, purchase for cancellation up to 178,738,237 shares, being 10% of the public float as at February 28, 2025. Canadian Natural will not acquire through the facilities of the TSX more than 2,835,635 common shares during a trading day, being 25% of the average daily trading volume of its common shares on the TSX for the six calendar months prior to the date of approval of the NCIB, subject to certain prescribed exceptions. The price which Canadian Natural will pay for any such shares will be the market price at the time of acquisition. The actual number of common shares that may be purchased and the timing of any such purchases will be determined by Canadian Natural.

Canadian Natural targets to manage the allocation of free cash flow on a forward looking annual basis, while managing working capital and cash management as required. In October 2024, the Board of Directors adjusted the allocation of free cash flow as follows: (i) 60% of free cash flow to shareholder returns and 40% to the balance sheet until net debt reaches \$15 billion; (ii) when net debt is between \$12 billion and \$15 billion, free cash flow allocation will be 75% to shareholder returns and 25% to the balance sheet; and (iii) when net debt is at or below \$12 billion, free cash flow allocation will be 100% to shareholder returns. Free cash flow is a non-GAAP financial measure. Canadian Natural considers free cash flow a key measure in demonstrating Canadian Natural's ability to generate cash flow to fund future growth through capital investment, pay returns to shareholders and to repay or maintain net debt levels, pursuant to the free cash flow allocation policy. Canadian Natural's free cash flow is used to determine the targeted amount of shareholder returns after dividends. Free cash flow is calculated as adjusted funds flow less dividends on common shares, net capital expenditures and abandonment expenditures.

In connection with the NCIB, Canadian Natural expects to enter into an automatic share purchase plan ("ASPP") in relation to purchases made by it under the NCIB. The ASPP has been pre-cleared by the TSX and is expected to be implemented on March 13, 2025. The ASPP is intended to facilitate repurchases of common shares at times under the NCIB when Canadian Natural would ordinarily not be permitted to make purchases due to regulatory restrictions or customary self-imposed blackout periods. Before the commencement of any particular trading black-out period, Canadian Natural may, but is not required to, instruct its designated broker to make purchases of common shares under the NCIB during the ensuing black-out period in accordance with the terms of the ASPP. Such purchases will be determined by the designated broker at its sole discretion based on purchasing parameters set by Canadian Natural in accordance with the rules of the TSX, applicable securities laws and the terms of the ASPP. All purchases of common shares made under the ASPP will be included in determining the number of common shares purchased under the NCIB. The ASPP will terminate on March 6, 2026. The ASPP constitutes an "automatic securities purchase plan" under applicable Canadian securities law. Outside of pre-determined blackout periods, common shares may be purchased under the NCIB based on management's discretion, in compliance with TSX rules and applicable securities laws.

As of February 28, 2025, after giving effect to the two for one common share split effective for shareholders of record as of market close on June 3, 2024 (the "Share Split"), Canadian Natural purchased 52,380,000 of its common shares at a weighted average price of \$48.35 under its previous NCIB, which commenced on March 13, 2024 and expires on March 12, 2025 and which authorized the purchase for cancellation of up to 180,462,858 common shares (after giving effect to the Share Split).

Canadian Natural is a senior crude oil and natural gas production company, with continuing operations in its core areas located in Western Canada, the U.K. portion of the North Sea and Offshore Africa.
